PROFESSIONAL PROFILE

Lead 2D Artist with **8+ years of professional games-industry experience**, developed entirely at **Rockit Game Studio**, progressing through hands-on 2D production into senior and lead-level responsibilities.

Contributed to the visual production of **1,000+ shipped game projects**, covering **game UI, 2D artwork, 3D model texturing, game icons, store screenshots, promotional banners and launch-ready marketing assets**.

Experienced in leading high-volume game art production while maintaining strong standards across **visual quality, usability, consistency and delivery speed**. Skilled at taking projects from initial visual direction and UI concepts through to polished in-game assets and commercially focused store presentation.

Strong background in **art direction, team mentoring, visual quality control, UI systems, texture production, promotional artwork and cross-functional collaboration** with artists, developers and production teams.

CAREER HIGHLIGHTS

- **8+ years** of continuous professional experience at Rockit Game Studio.
 - Contributed to **1,000+ shipped game projects** across multiple genres and visual styles.
 - Progressed from hands-on **2D Artist responsibilities to Senior and Lead-level ownership**.
 - Led and produced complete **game UI systems**, including HUDs, menus, progression screens, pop-ups, stores and supporting visual assets.
 - Created commercial **game icons, promotional banners, feature graphics and store screenshots** for release-ready products.
 - Produced and refined **high-quality textures for a wide range of 3D models and materials**.
 - Maintained strong visual standards across multiple projects running simultaneously.
 - Mentored and guided artists through visual feedback, paint-overs and design reviews.
 - Developed reusable UI elements, visual systems, templates and asset libraries to support faster production.
 - Worked closely with developers and production teams to balance **visual quality, technical requirements and deadlines**.
 - Adapted successfully across a wide range of game genres, themes, audiences and art directions.
-

PROFESSIONAL EXPERIENCE

ROCKIT GAME STUDIO

Lahore, Pakistan | On-site
August 2017 – Present

Lead 2D Artist

Career Progression: 2D Artist → Senior 2D Artist → Lead 2D Artist

Progressed within Rockit Game Studio from hands-on 2D production into a leadership role responsible for **game UI, 2D visual development, texture production, promotional artwork, visual quality and artist guidance** across a high-volume game production pipeline.

Key Achievements & Responsibilities

- Lead the visual development and delivery of **game UI, menus, HUDs, icons, buttons, pop-ups, progression systems, store interfaces and supporting 2D assets**.
- Contributed to the art production of **1,000+ shipped game projects** during my tenure at Rockit Game Studio.
- Create and supervise **store-ready promotional artwork**, including game icons, screenshots, promotional banners and feature graphics.
- Develop polished visual packages that take games from **in-game presentation through to release-ready storefront presentation**.
- Design high-impact **game and app icons** focused on visual clarity, recognition, composition and readability at small sizes.
- Capture, compose and enhance **gameplay screenshots** to communicate gameplay, key features and product quality effectively.
- Produce promotional banners and marketing visuals that remain consistent with each game's visual identity while presenting the product commercially.
- Create **high-quality textures for a broad range of 3D models**, working across different materials, themes, asset types and visual styles.
- Refine texture **detail, colour, contrast, surface definition and material readability** to achieve clean and polished results.
- Identify and correct texture issues including inconsistent detailing, visual noise, weak material separation and poor readability.
- Ensure textures remain visually strong while meeting **technical, performance and production requirements**.
- Maintain visual consistency between **3D assets, game UI, environments and the overall art direction**.
- Provide **art direction and visual quality control** across multiple projects and artists.
- Review artwork throughout production and provide clear feedback covering **composition, colour, lighting, typography, visual hierarchy and polish**.
- Mentor and support 2D artists through **paint-overs, design reviews, practical feedback and production guidance**.
- Translate game concepts, references, requirements and rough briefs into polished visual solutions.
- Establish and maintain reusable **UI kits, components, visual systems, promotional templates and asset libraries**.
- Help streamline production by creating repeatable workflows that improve **consistency, turnaround time and asset organisation**.

- Collaborate closely with **game developers, 3D artists, designers and production teams** to ensure assets are technically suitable and implementation-ready.
 - Review games during development to identify visual issues early and reduce unnecessary revisions later in production.
 - Manage multiple concurrent projects while maintaining consistent visual standards and meeting production deadlines.
 - Support project planning by assessing visual requirements, identifying art-production risks and helping prioritise workload.
 - Adapt rapidly between **different game genres, visual styles, themes and target audiences**.
-

LEADERSHIP & ART DIRECTION

- Art direction and visual quality control
 - Artist mentoring and development
 - Game UI direction
 - Design reviews and paint-overs
 - Production planning and prioritisation
 - Visual consistency across projects
 - 2D and texture quality review
 - Workflow optimisation
 - Asset-library development
 - Cross-functional collaboration
 - Delivery standards and deadline management
-

CORE SKILLS

Game UI & UX Visual Design

HUDs, menus, navigation, stores, pop-ups, progression systems, reward screens, settings, onboarding, gameplay interfaces and interaction states.

2D Game Art

Game assets, icons, props, backgrounds, graphical elements, illustrations, visual polish and production artwork.

3D Texture Art

3D model texturing, surface detailing, material definition, colour treatment, texture refinement, stylised textures and production-ready texture preparation.

Store & Promotional Art

Game screenshots, promotional banners, feature graphics, launch creatives, store presentation and marketing artwork.

Game & App Icons

Icon composition, readability, branding, visual hierarchy, recognition and storefront presentation.

Art Direction

Visual language, style definition, consistency, quality control, feedback, reviews and visual problem-solving.

Team Leadership

Artist mentoring, task guidance, feedback, quality assurance, workload support and team development.

Production

High-volume game pipelines, reusable components, asset optimisation, file organisation, template creation and implementation-ready delivery.

Visual Design

Composition, colour theory, typography, lighting, shape language, branding, visual hierarchy and material treatment.

Collaboration

Developers, game designers, 2D artists, 3D artists, production teams and project stakeholders.

SELECTED PRODUCTION EXPERIENCE

1,000+ Shipped Game Projects

Experience across a large-scale game portfolio including:

- Complete game UI systems
- Gameplay HUDs
- Main menus and navigation
- Level selection interfaces
- Progression systems
- Reward and achievement screens
- In-game stores
- Character and item selection
- Pop-ups and overlays
- Settings and utility interfaces
- Buttons and interaction states
- Game icons
- Item and inventory artwork
- Backgrounds and graphical assets
- 3D model textures
- Material and surface detailing
- Store screenshots
- Promotional banners
- Feature graphics
- Splash and loading screens

- Launch creatives
 - Marketing visuals
 - Production-ready asset preparation
-
